Kerckhoff B136 AV Instructions

Touch the Wall held Crestron to turn on projector

Connect HDMI to your Laptop/Macbook

- (Use adapter if necessary)

- Unmute volume button on the bottom if you are playing sound

Use Wall control to lower or raise the projector screen.

-User will need to look for the wall control on the East wall to either lower or raise the projector screen.

-It is a flick button so there's 3 different modes:

Press up once to raise projector screen.

Press down once to lower projector screen.

Press in the center once to stop raising/lowering projector screen.

Make sure the center is the selected button when finished adjusting the projector screen.

Reminders/Troubleshooting:

- If device reads the projector but doesn't show on screen, click Source Search or press the different source options on the remote.
- If the projector is not turned on, press the projector button next to the power button on the wallheld Crestron, projector should make a beeping sound when powered on
- Under Display settings, make sure external display is set to Mirroring/Duplicate
- For Apple users, you may be able to change your resolution under Display → Optimize for → Either Device or Projector, whichever user prefers.
- Projector screen should not display anything and projector's light should be turned off if system is shut down successfully.

AFTER USER IS FINISHED, PLEASE SHUTDOWN SYSTEM BY PRESSING THE POWER BUTTON ON THE TOP RIGHT OF THE CRESTRON SCREEN
