

Chen 222 & 322 AV Instructions

AV can be connected via HDMI or Wireless (Mersive Solstice)

Wireless Instructions:

On Crestron touch panel, select **Present** then touch **HDMI** to enable (“Stop” should appear underneath “HDMI” when enabled), Mersive Solstice home page should appear and await connection

- See TV screen for further directions
- May need to download Mersive Solstice program on device

HDMI Instructions:

1. After connecting laptop via HDMI, screen should automatically detect connection and should display what’s on your laptop.

- May need HDMI adapter for Macbook users
- If you only connect the HDMI then you can use the TV’s speakers or laptops’
- Connect USB to use Crestron’s microphone, speakers, and camera (may need adapter for laptops/macbooks)
 - o May need to change the laptop’s microphone, audio, & camera settings on the laptop or application (ex. Zoom)

If nothing happens:

- On Crestron touch panel, select **Present** then touch **HDMI** to enable (“Stop” should appear underneath “HDMI” when enabled)
- TV screen is turned on
- All wires (HDMI) are fully connected (no loose cables)
- Do not play/mess with the TV controls or wires underneath.
